SUMMARY

Results-oriented Python developer with expertise in Django and FastAPI for building scalable, secure, and high-performing backend systems. Skilled in engineering RESTful APIs, enabling real-time features, and optimizing application workflows across domains such as e-commerce, CRM, e-learning, and AI-driven platforms. Passionate about AI/ML integration, with growing knowledge in NLP, conversational AI, and recommendation systems. Strong collaborator with cross-functional teams, actively expanding frontend proficiency to evolve into a full-stack developer.

EXPERIENCE

Python Developer

Senscript Technologies Pvt Ltd

Jan 2025 – Present

Infopark, Kakkanad

- Engineered backend modules with Django and FastAPI to power e-commerce, CRM, and AI-driven platforms.
- Delivered real-time features with WebSockets and Django Channels to enhance interactivity.
- Designed and integrated REST APIs with third-party services to extend system capabilities.
- Optimized performance, resolved critical issues, and ensured high system reliability.
- Authored API documentation, mentored interns, and facilitated smooth frontend-backend integration.

Python Developer Intern

Senscript Technologies Pvt Ltd

Jun 2024 – Dec 2024

Infopark, Kakkanad

- Assisted in developing and testing Django-based backend modules.
- Contributed to building and debugging REST APIs, refactoring code, and improving efficiency.
- Documented small modules for maintainability and explored emerging frameworks (FastAPI, WebSockets).

Telecom Engineer Level 2

Saranga GeoSoftware and Engineering Services

Aug 2021 – May 2024

CSEZ, Kakkanad, Kerala

- Delivered 2.5 years of expertise in HFC Design and Drafting projects for Charter, USA.
- Promoted to Acting SME within 6 months for leadership and technical contributions.
- Conducted quality assurance, trained new team members, and prepared process documentation.

PROJECTS

AI-Powered Humanoid Robot – Unitree G1 EDU+

Developing an AI-powered humanoid robotics system using the Unitree G1 EDU+, focused on real-time object detection, distance estimation, voice interaction, and robotic control. Integrating computer vision, RGB-D/depth sensing, YOLO-based object detection, Python, and FastAPI to enable the robot to perceive its environment and respond to voice-based commands. Working toward intelligent object identification, localization, and autonomous interaction capabilities.

AI-powered Chatbot

Built secure FastAPI authentication with bcrypt, SQLAlchemy, and Alembic. Enabled file upload + metadata storage, semantic search with LangChain & ChromaDB, and WebSocket-based real-time chat. Developed admin UI, integrated AI services, and performed load testing with Locust for scalability.

AI Resume Analyzer

Ongoing Project

Developing an AI-powered platform for resume analysis and candidate evaluation, designed to analyze skills, experience, and qualifications and provide intelligent feedback and recommendations. Exploring AI/LLM integration, resume parsing, job-description matching, skill-gap analysis, and an interactive dashboard to deliver actionable insights for job seekers.

CRM System

Designed role-based access control (RBAC) with Django, REST APIs (Swagger), and a lead management module (CRUD, assignments, bulk uploads, Kanban tracking). Built dashboards and integrated Outlook/Gmail/Google Calendar APIs for seamless scheduling.

E-Learning Platform

Created a Django LMS with authentication, course/task APIs, automated scoring, and certificate generation. Enhanced learning engagement with video guides, FAQs, achievement tracking, and personalized recommendations.

Timelapse Camera Application

Engineered a Django backend with Raspberry Pi + DSLR via gPhoto2 for automated image capture. Designed scheduling UI, Celery for background execution, PostgreSQL models for logs, and automated deployments with shell scripts.

Doctor–Patient Consultation Platform (Freelance)

Delivered a healthcare platform for online booking, secure portals, and medical records. Integrated VideoSDK for real-time video calls, WebSocket chat for follow-ups, and AI-powered skin/hair analysis. Implemented Celery tasks and reminders with a responsive UI.

E-Commerce Website

Contributed to backend with Django, implementing authentication, catalog APIs, shopping cart, payment gateway, and refund workflows. Added invoice generation and OneSignal notifications for real-time updates.

SKILLS

Technical Skills

Python, Django, REST APIs, FastAPI, Flask, React, Pandas, PostgreSQL, MySQL, Celery, Redis, Websocket, SQLAlchemy, Alembic, HTML, CSS, Javascript, JQuery, Bootstrap, GIT, Postman, YOLO, OpenCV,

Soft Skills

Problem-solving, Researching, Communication, Teamwork & Collaboration, Adaptability, Attention To Detail, Time Management, Continuous Learning

EDUCATION

Diploma in Computer Engineering

2021

Sree Rama Government Polytechnic College Triprayar, Kerala

Higher Secondary

2018

P. Bhaskaran Smaraka GHSS Kodungallur, Thrissur, Kerala
